

Rowan Ashby

Mechanical Design Engineer

Summary

Mechanical design engineer focused on thermal systems, structural simulation, and design-for-manufacture across electric-vehicle programs.

Experience

Mechanical Design Engineer, Elmridge Mobility — 2021 to Present

- Developed thermal management assemblies for high-voltage battery packs.
- Ran structural and thermal simulations to support design-review milestones.

Design Engineer, Harrow Components — 2018 to 2021

- Produced detailed assembly drawings and tolerance stack-up analyses.

Skills

Programming:	Python, Java
CAD:	CATIA V5, NX
Simulation:	ANSYS

Education

B.Eng. in Mechanical Engineering, Westbrook University — 2014 to 2018

Coursework in finite element analysis, heat transfer, and manufacturing processes.
