

Dana Whitfield

Reliability Engineer

Summary

Reliability engineer with seven years of experience in test automation, component qualification, and field-failure analysis for regulated instrumentation.

Experience

Senior Reliability Engineer
Northwind Instruments

2023 – Present
Toronto, ON

- Designed an automated regression harness that shortened release verification from four days to one.
- Led a cross-functional reliability review covering firmware, hardware, and field-service reporting.

Reliability Engineer
Beacon Systems Group

2020 – 2023
Ottawa, ON

- Developed accelerated life-test procedures adopted across three product families.
- Improved mean time between failures by rebuilding the component qualification workflow.

Test Engineer
Gamma Precision Works

2018 – 2020
Montreal, QC

- Supported qualification testing for precision assemblies used in regulated environments.

Education

B.A.Sc. in Mechanical Engineering
Lakeshore Polytechnic Institute

2014 – 2018
Hamilton, ON

Skills

Test automation, accelerated life testing, failure analysis, statistical process control, technical documentation.
