Hiring Manager
Northshore Retail Systems
Vancouver, BC

Dear Hiring Manager,

I am writing to apply for the Senior Frontend Developer position at Northshore Retail Systems. With five years of experience building customer-facing web applications for retail and logistics companies in British Columbia, I am confident I can contribute immediately to your team.

In my current role, I led the rebuild of a customer order-tracking portal used by 40,000 monthly active users and reduced page load time by 38% through code-splitting and lazy-loading. I also mentor junior developers and run weekly code review sessions, which I understand is a priority for your growing engineering team.

I would welcome the opportunity to discuss how my experience aligns with your needs. Thank you for your consideration.

Sincerely,
Emily Tran
